## Personal Summary

I am a Computer and Information Sciences graduate majoring in Software Development and Data Science. I have hands-on experience building full-stack applications, working with clients, and contributing to Agile teams. I enjoy creating efficient and scalable solutions and exploring how technology supports interactive experiences. I bring curiosity, adaptability, and teamwork to every project. I am motivated to learn quickly, deliver high-quality solutions and continue developing technical and professional skills.

## Experience

**Full Stack Developer (Research and Development Project)** Auckland, New Zealand
*Foster Moore* July 2024 – Jun 2025

- Built and refined full-stack Learning Management System plugins using JavaScript/ HTML/ CSS and refactored legacy code to automate completion tracking.
- Applied agile practices to gather requirements, design wireframes, and conduct iterative testing to meet technical requirements and client needs.

**Computer Science Mentor** Auckland, New Zealand
